PROJECTS:

- ♦ **Airbnb** – conducted predictive analytics in Python to derive insights for the travel industry > [project details](#).
- ♦ **Instacart** – performed an analysis in Python to uncover customers' behaviors and built their profiles for targeted marketing strategy > [project details](#).
- ♦ **Rockbuster Stealth** – explored with SQL the inventory and revenues of a fictive movie rental store to launch an online rental service > [project details](#).
- ♦ **Influenza** – examined differences in staffing needs across US states to prepare for the next flu season > [project details](#).

EXPERIENCE:

Ringier Axel Springer, Warsaw, Poland

Technical Project Lead @Media Impact, 2017-2018

- ♦ Developed and expanded a short-video format with custom content for social media.
- ♦ Doubled the number of sold videos through intensive product training of the sales force.
- ♦ Collaborated daily with clients and agencies and delivered post-sales reports.
- ♦ Streamlined production and execution processes by working collaboratively with cross-functional teams.
- ♦ Prepared multilingual product presentation for internal and external stakeholders.
- ♦ Introduced the short-video concept within the international portfolio of the company.

Operations Analyst @Media Impact, 2016-2017

- ♦ Collected data and analyzed request/delivery workflow of customized campaigns within the advertising sales department based on monthly reports generated from Jira and sales CRM.
- ♦ Recommended process enhancement based on statistical analysis and reconfigured both, Jira and CRM, applications accordingly.
- ♦ Contributed to structural transformations and improved efficiency of the department.
- ♦ Reorganized and updated internal website with portfolio for the sales force.
- ♦ Conducted training for sales staff to effectively utilize the redesigned software.

Editorial Technical Specialist @Fakt Daily, 2013-2016

- ♦ Operated as a link between the newsroom, IT department, and the German-Swiss company owners accommodating the implementation of high-tech solutions in the editorial offices across Poland.

Guest-Control, Warsaw, Poland (Guest-One in Germany)

Technical Operations Lead, Co-Owner, 2010-2014

- ♦ Established a Polish branch of a German provider of online guest management tools.
- ♦ Designed market-specific digital system features.
- ♦ Executed recurring conferences using online registrations and controlled check-ins onsite.
- ♦ Delivered event statistics and recommendations for future meetings.
